- New equipment discounts
- Increased comfort
- Decreased energy bills!
- Free Batteries for your thermostat and Smoke Detectors
- Guaranteed Same-Day Appointments
(Call before noon)

What is a
***RENEW*venation?**

A *RENEW*venated System will:

1. Blow stronger air and colder or warmer air
2. Increase efficiency decreasing electric bill
3. Use far less energy doing it, reducing your utility bill
4. Have an increased refrigeration level (if needed)
5. Have a weather proof *RENEW*venated protective coating applied
6. Have the outdoor condenser coil deep cleaned
7. Live a much longer, happier life...

Here's what we do:

- We professionally clean all the baked-on plaque from the coils in your system, so it'll use less energy and cool more quickly
- We lubricate all moving parts and install a new pleated air filter
- We conduct a 47-point diagnostic including checking Freon levels and all operating pressures
- We install fresh batteries in your thermostat
- THEN we recalibrate your entire system back to factory-fresh specifications, improving performance with stronger airflow

What is a
***CHECK*tacular Inspection?**

Your HVAC Unit is a complex mechanical system. The *CHECK*tacular is your annual system safety check to ensure all wires, connectors and other parts are tight and functioning safely.

Here's what we do:

- Clean and tighten all elements, and lubricate all moving parts
- Put fresh batteries in your thermostat, ALL smoke detectors and CO detectors
- Clean your dryer vent
- Perform 52-Point Check
(including testing your electric heat, defrost cycle and all operating pressures, inspecting your ductwork for leaks, measure Freon level, etc.)
- Ensure all safety sensors are in good working order
- THEN we recalibrate the whole system back to factory-fresh specifications
- Improve performance with stronger, cooler or warmer airflow
